

Paulo Mantilla

Software Engineer

Mexico City, Mexico · paulomantillaa@gmail.com · <https://paulomantilla.dev/>

Education

Universidad Autónoma del Estado de Hidalgo (UAEH)

Bachelor's Degree in Software Engineering | GPA: 9.39 out of 10.00

Tlahuelilpan, Hidalgo, Mexico

Graduating December 2026

Relevant Coursework: Programming Fundamentals, Object Oriented Programming, Data Structures, Software Engineering, Database Administration, Information Technology Project Management, Operating Systems, Automata and Compilers, Distributed Database Systems, Computer Networks.

Professional Experience

Nexen E-Logistics

Full Stack Developer

Remote

April 2026 – Present

- Develop web platforms for foreign trade and customs clearance operations in the courier/express shipping sector, using React on the frontend and Laravel on the backend.
- Build interfaces, APIs and business logic for the generation and transmission of customs documents (customs declaration, manifests, waybills).
- **Technologies used:** React, Laravel, SQL Server, Git.

Freelance Web Developer

Remote

May 2025 – Present

- Deliver web platforms for small businesses and independent professionals end to end, from scoping and proposals through deployment and handoff.
- Build production sites and applications with Next.js, React and TypeScript, including e-commerce with Stripe/Mercado Pago integration.
- **Technologies used:** Next.js, Typescript, Convex, Tailwind CSS, Resend, Git.

ByDevs

Full Stack Developer

Tlahuelilpan, Hidalgo, Mexico

November 2024 – May 2025

- Architected and built a responsive, community-driven platform using React, Tailwind CSS, and a Spring Boot microservices back-end to serve as a resource hub and portfolio showcase for developers.
- Expanded the platform's reach to a global audience by implementing i18n for full multilingual support, making technical content accessible to a diverse user base.
- Enhanced platform security and user engagement by engineering a JWT-based authentication system and integrating an automated email notification service using Resend within a scalable Spring Framework microservices architecture.
- **Technologies used:** React, Typescript, NodeJS, Spring Boot, PostgreSQL, Tailwind CSS, Git.

Projects

Cívalo | <https://citalo.com.mx/>

Co-Founder & Full Stack Developer

July 2026 - Present

- Built a multi-tenant appointment-booking SaaS for service businesses in Mexico (barbershops, salons, nail and lash studios), with per-business public booking pages and a subscription model based on a 15-day free trial.
- Designed and implemented the payments layer on Mercado Pago Connect: each business connects its own account via OAuth and receives payments directly, with configurable per-service deposits to reduce no-shows, plus refund and rescheduling flows handled through the Mercado Pago API.
- Architected the platform as a single shared multi-tenant deployment organized by domain features, covering authentication and role-based access (owner, client, staff), scheduling, transactional email, and production payment flows.
- **Technologies used:** Next.js 16, TypeScript, Convex, Better Auth, Mercado Pago, Resend, Vercel.

Skills

Languages: TypeScript, JavaScript, Java, PHP

Frameworks: React, Next.js, Laravel, Spring Boot, SwiftUI, Node.js, Express

Databases: PostgreSQL, SQL Server, Convex, Supabase

Cloud & Tools: Vercel, Docker, Git, Resend, Stripe, Mercado Pago

Spoken Languages: Spanish (native), English (advanced)
